

Beaumont Deliver Upgraded Carter Braider

A new Carter 24 carrier wire braider, featuring a number of enhanced features, has just been delivered by Beaumont to a customer in the hydraulic hose industry.

New developments on the Carter braider are individual AC drives on deck and haul-off for softer starts and easy braid angle change. An automatic lubrication system for the deck and gears helps to reduce operating costs.

On the Supaload® carrier, again known for strength and reliability, Carter have introduced quick change tension springs and on-carrier wire killing devices.

The range of braiders is from 16 to 96 carriers in horizontal or vertical configuration.

Carter braiders have a reputation for reliability, long life and strength for higher tension applications.

The B&F Carter Division of Beaumont operate a spares and rebuild service for braiders of all types. New braider decks and complete new machines are also supplied.

Spare parts and consumables for Carter braiders and the Supaload® carrier are available from stock or quick delivery.
