

## Cable Machinery Spares – a new name for cost effective service, refurbishment & genuine spare parts

Cable Machinery Spares Ltd is a new company specialising in the supply of expert service, refurbishment and genuine spare parts for a wide range of cable making, wire drawing and braiding machinery together with ancillary equipment.

The company has been formed by a group of engineers with wide experience of cable making machinery; many of whom previously worked for B&F Carter, Winget Syncro or Babcock Wire Equipment.

The company maintains extensive contract records and original design drawings for over 70 different types of machinery. This enables key components and spare parts to be easily identified and replaced.

The ranges of machinery covered include:

- B&F Carter Braiders and Stranders
- Winget Syncro and Babcock Wire Rod Breakdown machinery
- Winget Syncro Wire Drawing Machinery
- Hanson & Edwards Tubular Stranders and Closing Machines
- Shackleton Industrial & Specialist Gearboxes
- A wide range of Ancillary Equipment for the above ranges, including Winders, Annealers, Spoolers, Coilers, Pointer / Stringers and Dancers

Managing Director Chris Livesey commented: "There are large numbers of these well proven machines in use throughout the world, requiring expert service and maintenance. Recent months have seen greatly increased activity in this field and substantial growth in sales of genuine spares and refurbishment services, often greatly extending the useful life of manufacturing plant. We also supply new equipment, as required by our customers."

Service, maintenance and plant relocation services are also provided for other makes of machinery.
